

Global Research and Certification

Get your products to more markets, *worldwide*

Valued Quality. Delivered.

In today's global market, the products you manufacture must meet numerous safety standards and industry requirements. Our Global Research and Certification offers guidance, testing, and certification to the legal, technical and market requirements of over 100 countries.

As a Certification Body in the international CB Scheme, Intertek offers a simplified way of obtaining multiple national safety certifications. We help get your products

into more countries faster and easier than any other testing provider.

Our team of experienced and knowledgeable project managers and engineers provide you with industry leading turnarounds, which grant you smoother market entry and the extra time-to-market that your product needs to be successful.

Intertek manages the entire product certification process from beginning to end, saving you time and expenses involved with global certification.

Efficiency and Aptitude

Our accomplished engineers know the market specific requirements you need to sell your products in virtually any market around the globe.

Valued Quality. Delivered.

Sell Your Products in More Countries

Intertek can assist in getting your products to more markets more efficiently and cost-effectively than any other independent testing laboratory. We provide:

- Testing and certification specialists who know your industry, your product, and the legal, technical and market requirements of virtually any country.
- 300+ accreditations, recognitions, and strategic partnerships enable us to test and certify to the product safety, industry performance and electromagnetic compatibility (EMC) requirements of markets worldwide.
- Strong relationships with the world's major certification bodies and insight into their policies and procedures.
- A global network of laboratories and qualified personnel who understand your markets – including local regulatory requirements, culture & language – from the ground up.

Products We Cover

- Electrical & Electronic
- Foodservice Equipment
- Home Appliances
- Industrial & Manufacturing
- ICT (Information, Communications, and Technology)
- Medical Devices

Your Single Source for Gaining Entry Into the Global Marketplace

Clients receive a customized, strategic approach to global market access that offers virtually every service necessary to enter the global marketplace:

- Country and market specific research into regulatory requirements
- Compliance evaluations
- Language translation
- Management of approval applications
- Liaison assistance with testing authorities and approval agencies
- Preparation and submission of testing and approval applications
- Testing coordination and scheduling
- Local support and guidance when testing must be coordinated in the desired markets sought for entry

Based on your products and desired markets, we combine the appropriate services into a customized, strategic market access plan. Intertek's Global Research and Certification allows you to follow the certification process every step of the way. It also allows multiple tests to be performed for multiple markets concurrently, to significantly reduce your certification time and costs.
